CHECK LIST
of
NATIVE VEGETATION
in
SOUTHWESTERN REGION

Region 3
FOREST SERVICE
U. S. DEPARTMENT OF AGRICULTURE

Accepted names in this list, both English and Latin, are shown in Roman. Synonyms are shown in italic.

The scientific names have been checked with the International code. Cross-reference and synonomy are given in some cases where names were different under the formerly used American code.

The common names agree with the STANDARDIZED PLANT NAMES or the FOREST SERVICE CHECK LIST except for a few cases where local usage has become so uniform that to require a change would cause confusion.

Quotation marks indicate names misapplied to species on this list and properly belonging to other plants. Annual grasses are designated with an asterisk. Standard symbols are given for each species.

This list does not include all of the native vegetation in the Southwestern Region. However, any omissions can be found in one of the many standard keys.

Form R3-2200-12 (5/63)
